|---------|-----------------------------------|
| SCD-167 | HEMAFLOW SCD (UNIVERSAL)          |
| SCD-181 | HEMAFLOW SCD CALF EXTENDER (PAIR) |
| SCD-182 | HEMA-FLOW SCD POWER CORD          |

HemaFlow allows a multimodal approach for venous thromboembolism (VTE) for high-risk orthopedic surgery patients. Current board guidelines indicate that aspirin is not appropriate as the only option for the prevention of DVT.

HemaFlow fits into the change in healthcare. The Deficit Reduction Act of 2005 requires hospitals to identify Hospital-Acquired Conditions. DVT and Pulmonary Embolism fall underneath this act which may result in penalties and payment reductions.

HemaFlow is covered by most insurance plans. Private Pay Organizations recognize the significant cost savings when a patient does not have to be readmitted to a hospital. HemaFlow fits into protocol driven medicine.
